

Marc Sitze

Full-Stack Web and Mobile Developer with expertise in React, Next.js, React Native, Laravel, Node.js, and TypeScript. Experienced in building scalable SaaS platforms, REST APIs, and cross-platform mobile applications. Skilled in integrating external services, optimizing performance, and translating UI designs into responsive, production-ready interfaces.

TECHNOLOGIES

JavaScript, Typescript, Tailwind, [React.js](#), React-native, [Next.js](#), [Node.js](#), [Express.js](#), [Nest.js](#), Laravel, Postgres, MySQL, MongoDB

Scalable Tools

Docker, Jenkins, Gitlab workflow

WORK EXPERIENCE

Fullstack Developer, Freelance (Full-Time) — Remote

Jan 2026 - Present

- Developed full-stack applications by bootstrapping both mobile apps with React Native and backend APIs with Laravel, delivering end-to-end solutions for client projects.
- Built and deployed cross-platform mobile applications using React Native, ensuring responsive UI and smooth performance on Android and iOS devices.
- Designed and implemented RESTful APIs with Laravel to support mobile and web applications, focusing on scalability, security, and maintainability.
- Integrated UI designs from tools like Figma into production-ready interfaces with strong attention to responsiveness and visual accuracy.

Senior Frontend Developer, DevSecutity Part-time - Remote

Sept 2025 - Dec 2025

- Developed responsive, high-performance web applications using React and TypeScript, ensuring type safety and code maintainability across a large-scale codebase. Implemented complex state management patterns with Redux to handle real-time inventory updates, shopping cart functionality, and user session management.
- Containerized frontend applications with Docker, streamlining development workflows and ensuring environment consistency across development, staging, and production deployments.
- Collaborated closely with product managers, UX designers, and backend engineers to translate business requirements into technical solutions, participating in architectural decisions.

Frontend Lead, Bubo Full-time — Remote, (FRANCE)

Jan 2024 - Jun 2025

- Led a team of frontend developers in building a sophisticated document management web application using Next.js, leveraging server-side rendering and static generation to optimize performance for document-heavy workflows and large file operations.
- Architected the frontend GraphQL integration layer using Apollo Client, implementing efficient caching strategies, optimistic UI updates, and real-time subscriptions that provided seamless document synchronization across multiple users and sessions.
- Designed and implemented an intuitive, accessible user interface with Material UI, creating custom components for document viewing, AI-powered search results, and metadata visualization that reduced document retrieval time by 60%.
- Integrated AI-powered features including intelligent document classification, automated tagging, OCR text extraction visualization, and semantic search capabilities, enabling users to find relevant documents through natural language queries.

- Established frontend development standards, code review processes, and CI/CD pipelines that improved code quality and reduced production bugs by 45% while accelerating feature delivery cycles.
- Collaborated with backend teams to design GraphQL schemas and API contracts that efficiently served AI model outputs and supported complex document querying patterns.
- Mentored frontend developers on React best practices, GraphQL patterns, and modern JavaScript techniques, conducting technical workshops and fostering a culture of continuous learning and innovation.

Software Engineer, Maviance, Full-time — On-site(Douala, CM)

Nov 2022 - Aug 2024

- Engineered responsive front-end interfaces with intuitive user experiences and modern visual design principles, translating complex requirements into clean, accessible UI components that improved user satisfaction and engagement.
- Designed and developed custom React components and reusable libraries tailored to specific project requirements, accelerating development timelines and maintaining consistency across multiple applications.
- Collaborated cross-functionally with product managers and UX/UI designers to ideate, architect, and deliver software solutions aligned with business objectives and user needs.
- Participated actively in code review processes, providing constructive technical feedback to peers that elevated code quality, promoted best practices, and fostered knowledge sharing across the development team.
- Diagnosed and resolved software defects through systematic debugging and root cause analysis, reducing bug recurrence and improving application stability.

Frontend Developer, Sweez • Part-time — Chaville, ile-de-France (Remote)

Feb 2023 - Jun 2023

- Maintaining existing code
- Add new components to the storybook
- Implement the calendar to define the meeting timeline

Mobile Developer, Alaxione Full-time — On-site(Yaounde, CM)

- Develop components and assemble them using CDD (Component Driven Development) architecture
- Implement application api screens and integrations
- Supervising interns
- Perform code reviews
- Participate in meetings with Product Owners to present and receive feedback on the app

Fullstack Developer, PNTEC-ltd — On-site(Yaounde, CM)

Sept 2020 - Jun 2021

- Work closely with the design and marketing team to better meet user needs.
- Integration of mobile payment methods, Orange Money and MTM MoMo, to enable users to purchase a package from the platform.
- Testing and debugging to ensure a smooth user experience, quickly resolving any technical issues.

EDUCATION/CERTIFICATIONS

GCE ADVANCED LEVEL - 2018

Back End Development and APIs - 2022

Frontend Developer (React) Certificate - 2024

JavaScript Algorithms and Data Structures - 2024

LANGUAGES

FRENCH - Native

ENGLISH - Professional
